OXYGEN

# HOME OF OXYGEN

At Duco, we provide oxygen to each building in a perfectly natural way. Allowing fresh air from the outside to directly enter a building through the building envelope, without the need for complicated air ducting systems : The ultimate guarantee of a healthy indoor climate. The occupant's health and well being are always of paramount concern to all Duco staff.

A well balanced combination of basic ventilation, night cooling and sun protection is essential to ensure that optimum air quality conditions are maintained. Residential buildings, office buildings, schools, leisure or healthcare buildings... Duco can provide innovative solutions to every project, so everyone will be sure to feel at home.

**DUCO**  
Ventilation & Sun Control

A low-angle, upward-looking photograph of a modern building's facade. The building features a complex, layered structure of horizontal and vertical metal slats and beams, creating a grid-like pattern. At the top of the building, a weather station is mounted on a tall pole, featuring a wind vane, a cup anemometer, and a radiation shield. The sky is a clear, bright blue with some light, wispy clouds. The overall composition is dynamic and emphasizes the architectural details and the scientific equipment.

Progressive  
Research &  
Development

## R&D

Duco has a progressive Research & Development centre. All solutions are developed in close consultation with clients and professionals alike, to meet up to their requirements. All products are carefully tested in Duco's own testing laboratories and at the most renowned research centres in Europe.

It is my responsibility as an architect to ensure that my projects are not only functional but beautiful. What I find such a plus point with regard to Duco is that they link the aesthetic aspects with the functional ones in all their products. Often I call in Duco's consultants during the design phase of a project. I want them to think along with me from the very start so that we can together offer the customer a total solution that fits in perfectly with the style of the building and the environment.

High quality  
Products

## PRODUCTION

Duco supervises the full production process from the drawing board through after sales customer care, because the company believes that quality should be given the highest of priorities. Therefore Duco uses the most modern of equipment and advanced automated systems.

When you submit a building application, you need to show that the file complies with regulations. I am in charge of checking this application as municipal officer and that is not always that easy. When I see that they are working with Duco systems, I immediately know that the file is fine with regard to this and that the calculations are correct. This means that I can process the paperwork faster and the project can start more quickly. And everybody benefits from this !

George Green

Strong in communication

## COMMUNICATION

Duco likes to keep its customers and other interested parties informed about the latest developments. The company regularly organises seminars to keep in contact with its markets and is always present at the most important European trade fairs. The [www.duco.eu](http://www.duco.eu) website is updated continuously, so visitors can always find some inspiration.

## ADVICE & SERVICE

Duco believes that it is essential that customers receive proper advice. It will be happy to assist in making the right choices for an end result that is functional, energy efficient, durable and aesthetic. Duco provides innovative solutions for residential and commercial buildings, so everyone is sure to feel at home.

When I consider all aspects, the obvious choice is Duco. As a fitter I believe that good support and service are essential and Duco is very good in this. I can find all the required instructions for installation on their website. Should I still need to ask something, I can always approach somebody from the office. This ensures that I can guarantee a fast and sound installation. This saves me time and expenses and, therefore, my customers benefit from this too !
